Prepared by GridBeacon AI

01 - EXECUTIVE INTELLIGENCE

Your ranking story in one page

The clearest answer to what is happening, what matters most, and what to do first.

AI VERDICT

Local Garage Door Pros has exceptional local visibility, with one clear northwest opportunity.

The business appears in all 81 scan points and ranks in the top 10 everywhere. Performance is strongest near the center and weakest in the northwest zone.

TREND: IMPROVING

VISIBILITY

+2.5 pts

100%

81 of 81 points are Top 10.

AVERAGE RANK

+0.7 pos

#2.47

Best #1 · median #1 · worst #9

TOP 3 COVERAGE

76.5%

62 of 81 grid points.

TOP 10 REACH

7.07 mi

Furthest point still ranking in the Top 10.

NOT RANKED

no change

0

Visible at every scanned point.

AI CONFIDENCE

High

The report contains complete 81-point ranking coverage.; Zone, distance-band, visibility, and movement metrics are provided.; The cause of ranking differences and historical movement is not measured.

WHAT MATTERS NOW

Target the northwest opportunity cluster

It has the weakest zone average and no top-3 points.

PRIORITY 1

MEDIUM

NORTHWEST ZONE AND ITS 19-POINT OPPORTUNITY CLUSTER

EVIDENCE SNAPSHOT

- 81 of 81 grid points rank at all
- 62 points are in the Map Pack (Top 3)
- Centre average rank: #1
- Perimeter average rank: #3.42
- Best opportunity zone (Northwest): 19 points, avg #5.74
- Gap to the strongest competitor: -32 grid points

Primary issue

Northwest rankings trail the rest of the grid.

Biggest opportunity

Improve rankings in the northwest opportunity cluster, where the average rank is 5.74 across 19 points.

02 - GEOGRAPHIC INTELLIGENCE

The shape of your visibility

The heatmap translated into ranking reach, directional strength and clear geographic meaning.

PATTERN DETECTED

Strong center → weak northwest

Average rank is 2.47, with 42 points at rank 1 and 62 points in the top 3.

HIGH CONFIDENCE

VISIBILITY FRONTIER

■ Top 3 ■ 4–10 ■ 11–20 ■ 20+ ■ Unranked

Each dot is one scanned point, coloured by the position held there. The ringed dot is the business location, at the centre of the scan. The faint lattice marks the scan grid, not roads.

AI GEOGRAPHIC READING

01 Strongest areas

Center: average rank 1.0 Southeast: average rank 1.22 Southwest: average rank 1.22 East and south: average rank 1.78

02 Weakest areas

Northwest: average rank 6.89 Northeast: average rank 3.0 North: average rank 2.89

03 Proximity

Performance declines with distance: average rank is 1.0 in the Inner band, 1.89 in the Middle band, and 3.42 in the Outer band. However, all 36 Outer points are ranked.

04 Where the growth is

The northwest zone has 9 points, all ranked, but 0 points in the top 3.

Visibility is broad across the full scan area, but northwest performance is materially weaker than other zones.

Ranking coverage

Grid points ranking at or better than each position. The bands are cumulative, so every Top 3 point is also counted in Top 10.

Out of 81 scanned points.

RANKING STRENGTH BY DIRECTION

DIRECTION	POINTS	AVG RANK	TOP 3	VISIBILITY	100%	STATUS
Center	9/9	#1	9		100%	Excellent
East	9/9	#1.78	9		100%	Excellent
North	9/9	#2.89	5		100%	Excellent
Northeast	9/9	#3	6		100%	Excellent
Northwest	9/9	#6.89	0		100%	Good
South	9/9	#1.78	9		100%	Excellent
Southeast	9/9	#1.22	9		100%	Excellent
Southwest	9/9	#1.22	9		100%	Excellent
West	9/9	#2.44	6		100%	Excellent

Status is the zone's average rank banded for reading: excellent to #3, strong to #6, good to #10, moderate to #15, weak beyond that.

AI opportunity zones

19 points

Avg #5.74

Best #4

2.74 positions from the Top 3

THE IMPORTANT INSIGHT

Not every weak point is a good target.

The Grid Opportunity Score (gos-1.0) weighs how far a cluster sits from the Top 3, how many points it covers, how close it is to the business, and how recoverable those positions look. A cluster already near the Top 10 can be worth more than a distant unranked one. It is GridBeacon's own prioritisation measure, not a Google ranking factor.

03 - COMPETITIVE INTELLIGENCE

Who controls the local market?

Competitor rankings converted into territory, pressure and a measurable path to the market leader.

Competitors won relatively few grid points compared with the 81 points measured for this business. Certified Garage Door Repair Tampa had 10 wins, Advanced Garage Door Repair had 5, and Chris Garage Door Repair had 4.

MARKET TERRITORY

● Local Garage Door Pros	51.9%
● Certified Garage Door Repair Tampa	12.3%
● Advanced Garage Door Repair	6.2%
● Chris Garage Door Repair	4.9%
● Tampa Door & Gate Repair .	3.7%
● Tampa Garage Door Repair Services	3.7%
● M&T Garage Door & Gate	2.5%
● Precision Garage Door Service of Tampa	2.5%
● One Garage Door Repair Inc	2.5%
● Other or unrecorded	9.9%

FIRST POSITIONS HELD

Grid points where each business ranked first, out of 81. Only businesses that appeared in this scan are named.

TOP COMPETITORS

COMPETITOR	GRID WINS	TERRITORY	BEST RANK	AVG RANK	RATING	REVIEWS	THREAT
Certified Garage Door Repair Tampa	10	12%	#1	#8.64	5	873	Medium
Advanced Garage Door Repair	5	6%	#1	#15.11	4.9	249	Low
Chris Garage Door Repair	4	5%	#1	#16.4	5	24	Low
Tampa Door & Gate Repair .	3	4%	#1	#9.11	5	13	Low
Tampa Garage Door Repair Services	3	4%	#1	#18.74	5	14	Low
M&T Garage Door & Gate	2	2%	#1	#12.2	4.9	46	Low
Precision Garage Door Service of Tampa	2	2%	#1	#12.98	4.9	3068	Low
One Garage Door Repair Inc	2	2%	#1	#18.26	4.9	35	Low

Threat is the competitor's share of first positions: high from 25%, medium from 10%, low below that. Rating and review count are the only non-ranking facts measured.

BIGGEST COMPETITOR THREAT

MARKET LEADER GAP

Certified Garage Door Repair Tampa holds 10 of 81 first positions.

Certified Garage Door Repair Tampa, with 10 grid wins.

0 pts

This business holds at least as many first positions as any recorded competitor.

Territory means share of first positions on the scanned grid. Nothing about a competitor's content, posts, links or activity is known to GridBeacon, and the scan does not record which business held each individual point.

03 - COMPETITIVE INTELLIGENCE

Why am I losing here?

A point-level view of the grid's hardest position, separating what is measured from what is not.

TERRITORY MAP

Each dot is the business holding first place at that scanned point, lettered by name. This is measured position, not market share.

Rating difference	+0.1 to them
Review count difference	+256 to you

What is measured, and what is not

● Measured here

- Position at every scanned point, for this business and the businesses that held first place.
- Rating and review count for each listed business.
- Proximity dependency across the grid: 0.

● Inferred, not proven

- Performance declines with distance: average rank is 1.0 in the Inner band, 1.89 in the Middle band, and 3.42 in the Outer band. However, all 36 Outer points are ranked.
- Certified Garage Door Repair Tampa, with 10 grid wins.

● Not measured at all

- Why Google placed this competitor first at this point.
- Distance from the business to this specific point.
- Any competitor signal beyond rating, review count and position.

Rating and review differences are measured facts, not established causes. GridBeacon cannot observe why a listing ranks where it does.

04 - AI DIAGNOSIS

Facts, causes, and unknowns

Trust comes from labelling confirmed facts, likely causes and unknown factors separately.

Confirmed facts

The business has complete scan visibility.

EVIDENCE visibility 100.0%; ranked points 81 of 81; unranked points 0.

MEANS It appears throughout the measured area for this keyword.

ACTION Protect this coverage while focusing improvement work on the northwest zone.

Top-10 performance is universal, but top-3 performance is not.

EVIDENCE top_10_percent 100.0%; top_3_percent 76.5%; rank_1 points 42.

MEANS The main growth opportunity is moving existing rankings into the top 3, rather than fixing missing visibility.

ACTION Prioritise areas ranking below the top 3.

Northwest is the weakest measured zone.

EVIDENCE northwest average rank 6.89, with 0 top-3 points out of 9.

MEANS This is the clearest geographic performance gap.

ACTION Investigate and improve local visibility signals serving the northwest area.

Rankings remain strong at the perimeter.

EVIDENCE perimeter average rank 3.42; Outer band average rank 3.42 across 36 ranked points.

MEANS The business has broad reach beyond the center.

ACTION Do not narrow the strategy to the immediate business area.

The latest scan shows measured improvement.

EVIDENCE 36 improved points, 1 declined point, 44 unchanged points, and visibility change 2.5.

MEANS Performance improved overall between scans, but the reason is not measured.

ACTION Continue monitoring before attributing gains to any specific activity.

Likely causes

The northwest gap is a focused improvement opportunity rather than a visibility failure.

EVIDENCE northwest visibility 100.0%; northwest average rank 6.89; northwest top-3 points 0.

MEANS It is likely that targeted work could improve positions already present in the results, but the cause of the gap is not proven.

ACTION Review legitimate profile, service-area, and location-relevance improvements specifically for the northwest coverage area.

Distance may contribute to weaker rankings farther from the business.

EVIDENCE Inner average rank 1.0, Middle average rank 1.89, Outer average rank 3.42.

MEANS The pattern is consistent with distance-related variation, but GridBeacon cannot prove the cause.

ACTION Track future scans by distance band.

● Unknown factors

- The cause of the northwest ranking gap is unknown.
- The cause of the measured movement is unknown because no intervening work was recorded.
- Review sentiment, review velocity, citations, website authority, backlinks, profile posts, photo activity, and competitor activity were not measured.
- The effect of any specific business or competitor change is unknown.

RANKING PATTERN DIAGNOSIS

5 confirmed facts, 2 likely causes, 4 unknown

The report contains complete 81-point ranking coverage. Zone, distance-band, visibility, and movement metrics are provided. The cause of ranking differences and historical movement is not measured.

The model's own confidence in this analysis.

RANKING ANOMALY MONITOR

2 anomaly signals flagged

The business ranks in the top 10 at all 81 points, yet the northwest zone averages rank 6.89 and has no top-3 points.

The business improved at 36 points while 44 points were unchanged; the available movement data does not explain why.

REVIEW RECOMMENDED

DATA COVERAGE

81 / 81

Grid points returning a position, from 8 recorded competitors and one earlier scan for comparison.

5 DATA GAPS

2 SOURCES

Data gaps in this scan:

Review text and sentiment are not collected

Citation and directory consistency is not checked

Backlinks and website authority are not measured

Google Business Profile posts and photo activity are not tracked

No work was recorded between these scans, so movement is not attributed to any action

05 - IMPROVEMENT PLAN

Prioritised actions with evidence

Every recommendation includes why it matters, where it applies, effort and a success metric.

Priority issues

Improve northwest top-3 performance.

Identify what legitimate local search factors may distinguish the northwest area from stronger zones.

Maintain complete top-10 coverage while pursuing top-3 gains.

#1 RECOMMENDED ACTION

Target the northwest opportunity cluster

It has the weakest zone average and no top-3 points.

PRIORITY

Critical · 1

EFFORT

Medium

TARGET AREA

Northwest zone and its 19-point opportunity cluster

EXPECTED IMPACT

Potentially improve rankings in the most visible performance gap.

SUCCESS METRIC

Raise the northwest average rank from 6.89 and increase its top-3 point count.

ACTION 02

Audit measurable local search fundamentals

Priority **High · 2**
Effort **Medium**
Target **Northwest coverage area**

EVIDENCE

The scan shows where performance is weak but not why.

SUCCESS METRIC

Improvement in a subsequent scan, especially northwest average rank and top-3 points.

ACTION 03

Repeat the same geo-grid scan

Priority **High · 3**
Effort **Low**
Target **Full 81-point grid**

EVIDENCE

Movement is measurable, but its cause is currently unknown.

SUCCESS METRIC

Compare northwest average rank, top-3 points, visibility, and overall average rank.

Priority is the model's own 1-10 ranking, shown with a word for reading: critical at 1, high to 3, medium to 6, low beyond that.

QUICK WINS

- Review the northwest ranking pattern
Low effort · Northwest zone
- Preserve current broad coverage
Low effort · Full scan area

STRATEGIC ACTIONS

- Run a northwest-focused improvement test
Medium effort · Northwest opportunity cluster
- Establish recurring geo-grid monitoring
Medium effort · Full 81-point grid

What not to change

Do not abandon the center, east, south, southeast, or southwest areas; each has 100.0% visibility and strong average rankings.

Do not treat the Grid Opportunity Score as a Google ranking factor.

Do not focus first on gaining visibility, since visibility is already 100.0%.

05 - IMPROVEMENT PLAN

What to protect, and what needs more evidence

A plan is only trustworthy if it also says what to leave alone and where it is unsure.

Protect what already works

DO NOT CHANGE

Do not abandon the center, east, south, southeast, or southwest areas; each has 100.0% visibility and strong average rankings.

DO NOT CHANGE

Do not treat the Grid Opportunity Score as a Google ranking factor.

DO NOT CHANGE

Do not focus first on gaining visibility, since visibility is already 100.0%.

What the top opportunity covers

NORTHWEST CLUSTER - MEASURED TODAY

Points in the cluster	19 of 81
Average rank today	#5.74
Best rank held in the cluster	#4
Average distance from the Top 3	2.74 positions
Grid Opportunity Score	70 / 100

These are the cluster's current measurements, not a forecast. GridBeacon does not predict where rankings will land, and no ranking outcome is guaranteed.

Where more evidence is needed

MISSING FROM THIS ANALYSIS

- Review text, sentiment, and review velocity.
- Citation and directory consistency.
- Backlinks and website authority.
- Website content, speed, and technical health.
- Google Business Profile posts, photos, and profile edits.
- Competitor engagement, advertising, and recent changes.
- The specific actions taken between scans and their causal effect.

CONFIDENCE IN THIS PLAN

High

The report contains complete 81-point ranking coverage. Zone, distance-band, visibility, and movement metrics are provided. The cause of ranking differences and historical movement is not measured.

Every action above is drawn from the ranking data in this scan. None of them is presented as a guaranteed outcome.

LOCAL RANK INTELLIGENCE

WHERE THIS LEAVES THE CAMPAIGN

Local Garage Door Pros is highly visible and broadly competitive for garage door repair. The business should protect its strong coverage and concentrate improvement effort on northwest top-3 performance.

Next: Audit legitimate local search improvements for the northwest zone, then repeat the same 81-point scan.

These figures come from two identical scans of the same keyword and grid. GridBeacon does not record what was done between them, so nothing here is attributed to a specific piece of work.

LOCAL RANK INTELLIGENCE

AI RANKING INTELLIGENCE REPORT

07 - NEXT MOVE

What should I do next?

One decision, one target, and one measurement plan.

NEXT BEST ACTION

Audit legitimate local search improvements for the northwest zone, then repeat the same 81-point scan.

Next scan plan

Repeat the same keyword and 9×9 grid, then compare northwest average rank, northwest top-3 points, overall average rank, visibility, and distance-band results.

Keep settings	9×9 · 5 miles
Measured next time	Visibility, average rank, top 3 points, zone movement

Final assessment

Local Garage Door Pros is highly visible and broadly competitive for garage door repair. The business should protect its strong coverage and concentrate improvement effort on northwest top-3 performance.

Not available to this analysis:

- Review text, sentiment, and review velocity.
- Citation and directory consistency.
- Backlinks and website authority.
- Website content, speed, and technical health.
- Google Business Profile posts, photos, and profile edits.
- Competitor engagement, advertising, and recent changes.
- The specific actions taken between scans and their causal effect.

APPENDIX – METHOD AND PROVENANCE

Data sources and methodology

A record of what this analysis used, what it could not see, and how GridBeacon's own scores behave.

DATA USED

- | | |
|----------------------|--------------------------------|
| Geo-grid scan | 81 points · 9×9 · 5 miles |
| Comparison scan | 1 earlier scan · Aug 20, 2026 |
| Competitors recorded | 8 businesses |
| Business profile | category, rating, review count |
| Location data | Business and scan coordinates |
- GridBeacon geo-grid ranking scan. Google Business Profile listing data returned with the scan.

NOT AVAILABLE TO THIS REPORT

- Review text and sentiment are not collected
- Citation and directory consistency is not checked
- Backlinks and website authority are not measured
- Google Business Profile posts and photo activity are not tracked
- No work was recorded between these scans, so movement is not attributed to any action

Metric definitions

Grid Opportunity Score (gos-1.0)

Ranks weak clusters by how far they sit from the Top 3 (40%), how many points they cover (30%), how close they are to the business (20%) and how recoverable those positions look (10%). GridBeacon's own prioritisation measure, not a Google ranking factor.

Visibility

The share of scanned points where the business ranked inside the top 10.

Market territory

The share of scanned points where a business ranked first. Every point has exactly one first position, so these shares divide the grid.

Visibility frontier

The furthest scanned point at which a given position was still held. A position never held is reported as never held, not as zero miles.

THE GRIDBEACON STANDARD

Scan → Understand → Act → Re-scan → Measure → Learn

Facts first, assumptions labelled, unknowns admitted. No recommendation in this report is presented as certain unless the measured data supports it, and every major claim keeps its evidence and confidence attached. GridBeacon measures rankings; it does not observe why Google ranks a listing where it does.
